

Five advice for a stress-free and successful children's birthday party

1. If the participating children are taken to the museum individually, please arrange to meet them in front of the museum 15 min before the party. There you can welcome the children and make sure that everybody is present. Please enter the museum as one group and be on time. Upon arrival you will be welcomed by one of our museum educators.
2. The smaller the group, the more attention an individual will get. Our advice to you is to invite (about) the number of children that corresponds to your child's age.
3. You will be more relaxed during the cake break if an appropriate number of adults are around to look after the children. For groups of up to 10 children we suggest two caretakers. For groups of 11–20 children please bring three to four adults.
4. The interactive guided tour through the museum with all the animals that can be admired is the main attraction of our birthday parties. Please don't worry too much about organizing a fancy cake break. Often-times less is more.
5. If the children get picked up individually at the end of the party, please meet the other parents in front of the museum at a previously agreed time.
